Examination regulations for the Master's program in Mathematics in view of the restrictions in university operations due to the Corona pandemic

In view of the current measures to contain the corona pandemic, the following regulations apply to our Master's study program (decision of the Examination Committee of 2 April 2020):

1. **Registration for the Bachelor / Master examination for new students**
   Registration for the Bachelor's and Master's examination ("Registration at the Bachelor-Master Office") is done electronically or by post. The necessary documents must be submitted to the Bachelor-Master Office together with copies of your identification documents by e-mail or by post. The deadline is extended until 30 April 2020.

2. **Examination dates and excuse regulations for examinations**
   It is still unclear when the cancelled examinations of the winter term 2019/20 can be arranged. However, we will announce them at least two weeks in advance. If you are unable to attend the newly scheduled exam, you can cancel your registration by writing a request to the Bachelor-Master Office. This will then be treated as a case of illness. However, we will not be able to offer third examination dates. In this case, the module examination can only be completed in the winter term 2020/21.
   Registration for the exams of the summer term 2020 take place, as always, between June 1 and 20. We will publish the dates as soon as we have more planning security. Please understand that it is currently completely unclear whether the dates can take place as planned in the second half of July and the second half of September.

3. **Seminar participation in the summer term 2020**
   You may cancel your registration for a planned seminar in the summer term 2020 if you are unable to take part in an attendance-free seminar. To do so, it is sufficient to inform the lecturer before 20 April 2020 at the latest and not register for the examination in BASIS during the registration period 1 - 30 April 2020. Of course we hope that you will attend all our seminars in new formats.

4. **Deadlines for Bachelor's and Master's theses**
   According to the decision of the Examination Committee, the working time for all ongoing theses has already been extended by four weeks. In case of a continuing closure of the libraries and the limited supervision by the lecturers, further extensions of the working time will be possible. For this purpose, a reasoned written request must be submitted to the Examination Committee.
5. Mentoring and study counselling
   A large number of mentoring discussions and study counselling meetings are possible via telephone and video conferences. Contact your mentor, the student council and/or the Bachelor-Master Office. We are all here for you!

Bonn, 3 April 2020

Prof. Dr. Herbert Koch
Vorsitzender des Prüfungsausschusses
