

Conference

“ARTIG 5
Algebras and Representation Theory in Germany”

February 14 - 15, 2025

organized by

Henning Krause, Rene Marczinzik, Jan Schröer

• **Friday, February 14**

11:00 - 13:00	<i>Self Registration</i>
13:00 - 14:00	Markus Reineke Expander representations
14:00 - 15:00	Rene Marczinzik Auslander regular algebras and Coxeter matrices
15:00 - 15:30	<i>Coffee Break</i>
15:30 - 16:30	Karin Erdmann 3- Cluster tilting modules for weighted surface algebras
16:30 - 16:50	Viktória Klász Ringel's homological bijection, Auslander regularity and the delooping level for Nakayama algebras
16:50 - 17:10	Jan Thomm Auslander–Reiten sequences in minimal A_∞ -structures of the module category of a representation finite algebra
17:10 - 17:30	Tal Gottesman A small dictionary for the representation theory of lattices
18:30	<i>Conference Dinner at Delikart Restaurant</i>

• **Saturday, February 15**

09:00 - 10:00	Lidia Angeleri Hügel Mutation via the Ziegler spectrum
10:00 - 11:00	Monica Garcia Semistability and projective presentations
11:00 - 11:30	<i>Coffee Break</i>
11:30 - 12:30	William Crawley-Boevey Clannish algebras with idempotent loops
<i>afterwards</i>	<i>closing</i>
